10. BRIEF SUMMARY OF SIGHTING Shiny silver colored object, cigar shaped, observer moving from NW to NE. When object reached half of flight appeared to be chased by a/c. Object then made a sharp left turn and disappeared quickly. 10 min later another UFO appeared from the same NW location and the pattern was repeated, in that a plane chased the object and it disappeared. Pattern was repeated six times all objects coming from the NW and being chased and disappearing. No wings on objects. No vapor trails.			11. COMMENTS Letter requesting additional information sent but no answer returned. Without additional information no valid conclusion can be reached. From the pattern it is possible that some type of training mission with drones or other configuration was in progress. Case listed as insufficient data.

Dear Sir:

I have seen in the newspaper
some time ago, that the Defense Dept.
considers U.F.O.'s as serious business
why? The reason that I am asking this
question is, on Sept. 2, my son (14),
my daughter (9) and myself saw a very
strange sight. In fact I have never
seen anything like this before. We were
at Murre Lake, it was a clear
cloudless day. It was a little past 3
when we saw this thing, a cigar colored,
cigar shaped object. The top had a slight
concave top (like a bucket). It came from the
NW & went in the NE direction. About
4:00 pm later we saw another one of these
objects coming from the same NW direction
when it got half way across the lake we
saw it then saw a plane go after it.
The object made a sharp left turn &
& disappeared very quickly. About 4:15
later we saw still another one coming
in from the same NW direction. This one too
made a sharp north turn & a plane
went after it. We saw 3 more of these

objects, 7 of them in all. The last one app-
eared about 4:15. Only once did we
see a white object in the sky at one
time. One was like a pin-point in the
N.E. which another appeared in the N.W.
The second from the last one turned
north even before it got halfway in
the sky. All 7 objects came from
the N.W. direction. These objects did
not have wings on them. They re-
mained the same bright silver
color, and we did not see any vapor
or anything like that come from them.
I would appreciate hearing from
you on this matter.

Sincerely

Mrs. [REDACTED]
