Call'd 16 May 65 — Fld 18 May 65

[redacted], [redacted] called and wanted to know when her sighting was that she had in May, said it was in the first= two weeks. I said I would aall her back. Called her back and told her it was 3 May she wanted to know if it was solved and I said yes it had been evaluated as the satellite ECHO II. She said that was not the one she meant, the one I was talking about was the first satellie she had ever seen. The other report she and her sister, [redacted] made had three observationsand would I please look it up and tell her what the evaluation was. Called her back and informed her that her sighting of 18 May 65 was an aircraft. She then talked to Major Quintanilla regarding the UFO program in general. She wanted to know why the DOD turned down Maj Q's request to be on Greg Wallace's show. Maj explained that there were too many requests for this nature for just one person to handle and that yes he had told Greg that he would be on the program if DOD approved. But DOD said that if he did it for Greg then he must do it for all the others. Major explained that there were only the four of us on the project.

She wanted to know if we thought she was a crackpot. Replied no. She wanted to know about satellites and why they sometimes appeared irregular lighting when passing exx overhead. Major explained that some of these were rocket boosters, fragments etc and that they were tumbling and that the light did not always show on them when they did this. They were quite satisfied with the answers Major Quintanilla gave them.

Heard the rumble of jets.

The stars were clearly visible, but some streaks of ~~cloud~~ mists.

Would have answered sooner but was very busy.

I have been watching the stars for a month, and I have seen Jets go over, some you can see, some you can't. Fri 5/21/65 I counted 6 Jets go over they looked like a small light going across the sky. I looked through Binoculars and seen the whole outline of the plain. The light I seen 5/18/65 was larger but similar, and color different. and through Binoculars the shape was completly different.

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

Explaining the light I seen, I have lived by an air port for five years, with an air route over my house. I have watched them turn on there landi~~n~~g lights countless times which look like they sweep the ground and then rise straght ahead of them.

The light that came from the offject come straight down, the color was light gold and was only on about 2 or 3 sec. and then went off.

The pipe which I will call it, comming from the light was a Sgragar braun was not lite up. and was only seen throght Binoculars

The other 2 offject is were identical but seem to be smaller or higher.

I'm not an over excited or bored housewife who seen something strange and wants everyone to know. I have a very open mined, and what I seen was not a Jet or a refueling mission jets. but something strangely and completly different

Mr. [redacted] called and gave me the information described in this form. As he said it looked like a light on an airplane but had no wing lights,or better yet it looked like a satelite. Then he asked if we had any satelites in the area tonight because that is sure what it looked like. I got all of the information from him that I [redacted] thought was required to complete the form. [redacted] The weather listed was obtained from the Patterson weather station at 2145E. Mr. [redacted] did not ever call the light an Unidentified Flying Object (UFO). He seemed more interested in finding out if we had any satelites out inthe area tonight.
