

PROJECT 10073 RECORD

1. DATE - TIME GROUP September 65	2. LOCATION Fayetteville, Arkansas
3. SOURCE Civilian	10. CONCLUSION INSUFFICIENT DATA FOR EVALUATION
4. NUMBER OF OBJECTS ONE	Will evaluate when form 164 and negatives are received.
5. LENGTH OF OBSERVATION Not Reported	
6. TYPE OF OBSERVATION Ground-Visual	11. BRIEF SUMMARY AND ANALYSIS Observer was taking pictures of a satellite crossing. On two films a round black object with a definite halo of light and a short halo tail appeared. The second shot of the object was identical but smaller. The object was not seen when the pictures were taken.
7. COURSE Not Reported	
8. PHOTOS <input checked="" type="checkbox"/> Yes Not Received <input type="checkbox"/> No	
9. PHYSICAL EVIDENCE <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

Mrs Hunt/sh/SAFOICC/72842/17 Feb 66

Dear Mrs. [REDACTED]

Please excuse the delay in replying to your letter regarding photographs taken by your friend.

Should your friend desire to have the films analyzed by the Air Force, she should forward the original negative to this office. The original negative will be returned upon completion of the analysis, and you will be informed of the results.

I am inclosing a report on Project Blue Book, the Air Force UFO project. I hope this information will be of interest to you.

Your interest in Air Force matters is appreciated.

Sincerely,

1 Atch

Reference the attached letter from [REDACTED] requesting information on unidentified flying objects. Miss [REDACTED] indicates that a friend of hers photographed an unidentified flying object during the first week of September. Should she desire to have these films analyzed, it is requested that the original negatives be forwarded to the Foreign Technology Division at Wright-Patterson Air Force Base. The original negative will be returned upon completion of analysis. Her friend's name and the results of the analysis will be held in confidence by the U S Air Force.

To whom it may concern, Re: UFO's

Several years ago I considered writing you, but thought perhaps you would not be interested since my UFO sighting was so long ago--in 1936, in Panama Canal Zone. However, in the last two weeks by most unusual circumstances, I have been shown time exposures, by a complete stranger almost (from the state of Washington), which delineate an aerial "path" of a UFO in the exact pattern I watched an orange-red object take so many years ago in Panama.

By my own judgement I think I'm a fairly well qualified observer but it would take a couple paragraphs to tell you why. If you wish to hear more about this for any reason I will give you my qualifications.

Two days ago, also, I phoned a news reporter to arrange a meeting with her so that I could show her these pictures. At the same time she phoned me to tell me about a UFO she had snapped with her 35 mm. Cannon camera when she was taking a picture of a satellite passing over this area. She had not known that a satellite could be "stopped" in air by the camera but it was caught beautifully--a silvery elongated thing. The surprise, though, consisted of an object which appeared on the next two immediate films--a round black object with a definite halo of light and a short halo tail (showing direction of travel). The second shot of the object was identical but smaller, revealing that it was considerably further away in a very short time lapse. My friend had not seen this object when she took the picture. If you would care for these pictures I am sure I could secure prints for you. She took it the first week in September as well as she can remember.

Also, we have seen something very strange in our telescope recently, but are trying to check to see if it can possibly be some kind of a fluke reflection in the scope. It appears as a dark round object with an illumined arc edge and it rides out the bottom of the telescope instead of the top, as do the stars and planets, due to the turn of the earth. If it is anything, therefore, we figure it would have to be traveling with us at a slightly faster speed. But, as I say, it may be something with the scope itself. We considered nebula, but at the distance they would be, they would also ride out the top of the scope as the planets.

If you do not wish to write, I know you're busy, and I feel that the UFO problem is certainly an enigma!

Sincerely,
[REDACTED]
