10. BRIEF SUMMARY OF SIGHTING All 17 objects slightly larger than pinhead; changed color--vivid purple, red, amber. 2 or 3 times two smaller green specks appeared, one on each side. Occasionally a light would shine down.		11. COMMENTS There were two 1st magnitude stars and the planet Mars near the horizon to the NW plus a temperature inversion. The inversion would cause the astro bodies to appear higher than they actually were and would also cause the color changes. This is probably the cause for the sighting.

Subject spoke of "UFO's" as something from outer space without actually saying so. He spoke several times of a book on UFO's, and seemed to want to believe what he had read, as if this were living proof. Subject had called the Weather Bureau at Indianapolis and said "they told me what they thought it was" in a manner that indicated he believed the W.B.'s answer to be totally incorrect, and not worth repeating. Subject works for a Chevrolet auto dealer in Indianapolis. He appeared to enjoy the interview. Some answers were too vague to include in the sighting report.

Captain Waldrop, assigned to Flight Service, called at 0300 hrs. to ask if Mr. [REDACTED] had reported to ATIC. In Capt. Waldrop's opinion the object in question is Venus, and the existence of a high haze layer in the area accounted for the changes in color. Capt Waldrop reported that Flight Service had received three other UFO reports during the night of 30 Aug. 60.
