PROJECT 10073 RECORD CARD

1. DATE
5 November 1957

2. LOCATION
Whitman AFB, Missouri

3. DATE-TIME GROUP
Local
GMT 05/1020 - 1215

4. TYPE OF OBSERVATION
☐ Ground-Visual ☒ Ground-Radar
☐ Air-Visual ☐ Air-Intercept Radar

5. PHOTOS
☒ Yes Radar
☐ No

6. SOURCE
Military Radar Personnel

7. LENGTH OF OBSERVATION
Separate sightings
1 to 15 minutes

8. NUMBER OF OBJECTS
7, separately

9. COURSE
varied

10. BRIEF SUMMARY OF SIGHTING
A number of radar tracks at different times were observed on the evening & night of 5 Nov 57. The objects would speed up then slow down with no set pattern to direction. The speeds, however, appeared so slow as to first indicate ground targets. Traffic checked in area indicated B 7 and an airliner but could not account for the radar returns shown, although the blips did resemble a/c.

11. COMMENTS
Review of all factors; locale, fact that activity took place within short distance of runway, weather conditions, temperatures, etc. indicate that the returns were spurious. RAPCON (search radar) set used.

12. CONCLUSIONS
☐ Was Balloon
☐ Probably Balloon
☐ Possibly Balloon
☐ Was Aircraft
☐ Probably Aircraft
☐ Possibly Aircraft
☐ Was Astronomical
☐ Probably Astronomical
☐ Possibly Astronomical
☒ X Other Spurious Radar Rtn
☐ Insufficient Data for Evaluation
☐ Unknown

ATIC FORM 329 (REV 26 SEP 52)

PAGE TWO RJHNG 71

ZULU ANOTHER SIGHTING, SAME PATTERN.

SPEED ESTIMATED AT 120 KNOTS. PART V-1038 ZULU A LARGER UFO SIGHTED APPROXIMATELY 50 NM NORTH OF WHITEMAN AFB. HEADING WAS 290 DEGREES AND SPEED 140 KNOTS. PART VI - 1057 ZULU, 3 UFO'S SIGHTED 40-50 NM NORTH OF WHITEMAN AFB, HEADED EASTWARD. SPEED AND RANGE NOT RECORDED. PART VII- 1204 ZULU, 3 UFO'S SIGHTED NORTH OF WHITEMAN AFB AT 30-50 NM. HEADING VARIED 090-135 DEGREES. SPEED OF FIRST OBJECT ESTIMATED AT 300-350 KNOTS. LAST OBJECT SLOWED DOWN TO APPROXIMATELY 90 KNOTS. PART VIII- 1215 ZULU, ONE UFO 50 NM WEST OF WHITEMAN AFB ON BEARING OF 270 DEGREES. AIR DEFENSE COMMAND NOTIFIED AT RICHARDS-GEBAUR AFB. THEY ADVISED THAT COMMERICAL AIRLINER WAS IN AREA AT TIME OF THIS SIGHTING. PART IX- MILITARY FLIGHT SERVICE WAS KEPT INFORMED OF ALL SIGHTINGS. NO TRAFFIC REPORTED IN AREA AT TIME OF SIGHTINGS EXCEPT FOR POSSIBILITY NOTED IN PART VIII. PART X- WEATHER CONDITIONS DURING SIGHTINGS AS FOLLOWS: CLOUD COVERAGE 2500 FEET SCATTERED; 15,000 FEET OVERCAST, VISIBILITY 15 NM AT SURFACE. WINDS 120 DEGREES, 3 KNOTS (SURFACE), 240 DEGREES, 15 KNOTS (5000 FEET) 260 DEGREES AND 25 KNOTS (15,000 FEET). 270 DEGREES, 30; KNOTS (20,000 FEET) PART XI- RADAR EQUIPMENT CAPABILITY PLACE ALL SIGHTINGS BELOW 20,000 FEET ALTITUDE. SIZ OF OBJECTS UNDETERMINED. RADAR RETURN SIMILIAR TO SHAPE CREATED BY AIRCRAFT. PART XII- MSG TRANSMITTED IN COMPLIANCE WITH AFR 200-2.

AFCIN-4E1a/V. D. Bryant/jc
72131/Bldg 263-D/Rm 8

1. Except for the rather slow speeds reported, there is little of the unusual in these reported sightings. The fact that no intercepts were attempted, and also that no reference is made to visual observation or observation by other radars in the area make it impossible to determine with any degree of certainty whether the targets observed were true or false.

SUBJECT: (U) Unidentified Flying Objects

TO: Commander
Air Defense Command
Ent Air Force Base
Colorado

1. Reference message this Headquarters, DOI-750, dated 7 November 1957.

2. Attached are six diagrams dipicting the tracks of UFOB's. The diagrams were prepared as it was noted while observing the UFOB's on the search radar that the initial inbound tracks appeared to home in on the radar transmitters. The targets would change direction when they were within one (1) to two (2) miles of the radar transmitters. It should also be noted that there was no set pattern in regards to the direction the targets were moving.

3. When on the radar scope, the UFOB's were easy to recognize and track as they gave a good clear return that was as large and bright as a B-47 target. A UFOB and B-47 (B-47 was in a holding pattern on the radio beacon) were on the scope at the same time and thus it was possible to compare their radar returns. One difference was noted between the UFOB's and B-47 targets, the UFOB's were round and were not distorted by the radar sweep while the B-47 targets gave an elongated appearance on the search radar scope. On the precision radar, the UFOB's gave a return that appeared the same as an aircraft.

4. As plotted on Inclosures #1 thru 6, it appears that the UFOB's made sharp turns or changes in direction. However, their turns were gradual when visually observed on the radar scope and the turns could be noted primarily by plotting the target bearings from the station.

5. Radar Photographs:

a. Inclosure #7 is a photograph of UFOB crossing the precision scope from left to right (west to east) at 1833L 6 November 1957. (Ref incl #3 for diagram of target tracked from 1829L to 1843L 6 November 1957). The photograph is of poor quality as the camera was hand held and the face of the radar scope was not removed. The photograph was taken with color film, F-2 at one-fourth second. At the time this photograph was taken, the UFOB target was comparable to the return of a B-47 aircraft and was tracked on both the azimuth and elevation sectors of the precision scope.

DOI, SUBJ: (U) Unidentified Flying Objects

b. Inclosures #8,9 and 10 are photographs taken in sequence of an UFOB on the search radar. These photographs were taken on a tripod held C-6 Speed Graphic camera with black and white film at approximately one (1) minute intervals. The time element is an estimate as the exact time intervals were not recorded. This target was of short duration and was not reported in the message or reflected on attached diagrams (inclosures 1-6).

Request for Analysis - Electronic UFO Reports

AFCIN-4E1 AFCIN-4E4 25 NOV 57

Attn: Col. Hoffman

1. Request that the attached radar reports, together with scope plots and photographs be reviewed, and an analysis be made by comment attached on separate sheets.

2. Radar UFO report on TT Msg carries a "Priority" classification. The other (Plots and Photos) has resulted in queries from Headquarters, USAF regarding our findings.

3. With regard to the latter report -- a careful plot indicates that the "UFO blips" appeared within a 1 to 3 miles radius of the radar unit intermittently for three hours, yet it appears that no attempt was made to visually identify, or check on the cause of signal.

4. This office should like to bring to your attention, that in contrast to previous periods when only an occasional radar UFO would be received, a large number are now being submitted. These will be submitted often a screening and successful analysis by this office.

5. In accordance with suggestions made in conference with Maj [redacted] last July; field units have been notified that all possible data together with scope photos should be submitted with subject reports, if successful conclusions are to be made. Current reports indicate that this is being complied with.

AFCIN-4E1a/V. D. Bryant/jc
72131/Bldg 263-D/Rm 8

1. Reference is made to subject report submitted from Whiteman AFB, Missouri.

2. The information submitted, while voluminous, does not include a great deal of data which would be required for a thorough analysis of the report. The speeds, as determined from the charts, are all speeds so low as to indicate a ground target, rather than an airborne target. The fact that the greatest activity took place within 3 miles of the runway, (much of it within 1 mile) at about 1800 with no visual sighting indicates spurious response of some kind.

3. It is realized that the information submitted herein is of little comfort to personnel who have seen such returns on their radars. For this reason efforts are being made to secure a competent consultant on these matters who will be able to provide a more positive approach to this subject than is currently possible.
