1. DATE 1 Jul 61	2. LOCATION 4414N 3948W (ATLANTIC)	12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon <input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft <input type="checkbox"/> Was Astronomical <i>METEOR</i> <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical <input type="checkbox"/> Other <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
3. DATE-TIME GROUP Local 0045 GMT 010345Z	4. TYPE OF OBSERVATION <input type="checkbox"/> Ground-Visual <input type="checkbox"/> Air-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Intercept Radar	
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Military	
7. LENGTH OF OBSERVATION 15 sec	8. NUMBER OF OBJECTS 1 then 2	9. COURSE Descending
10. BRIEF SUMMARY OF SIGHTING Tear-drop shaped objt, about size of half dollar, blue-green in color, w/orange outline and orange tail. Tail resembled a jet exhaust about size of dime. First noticed 60° above horizon descending at a 60° angle w/horizon. About 30° above horizon objt separated into 2 parts, first piece about 3 times size of second piece. Appeared to be on a course of 000° T. Objts burned out and disappeared above horizon. A/c altitude 6000'.		11. COMMENTS There were no reported reentry of satellites at time of sighting. Description characteristic of a bolide entering earth's atmosphere and breaking up. Duration is excessive for normal meteor, but this can be accounted for by its northerly course.
