| 7. LENGTH OF OBSERVATION 2 Hours | 8. NUMBER OF OBJECTS Multiple | 9. COURSE * | |
| 10. BRIEF SUMMARY OF SIGHTING Blue object (one side red, one side green) or objects. Observed as one big one with 6 or 7 small ones forming tail. Looked like afterburner projecting downward. Loud roar lasting 2-3 seconds (3 times) Low altitude, then climbed and drifted slowly. Object still in sight after 2 hours. Motion up and down. | | 11. COMMENTS Duration indicates astronomical object erratic motion (if confined to small area) Attributed to possible inversion or atmospheric conditions. Other Balloon unlikely due to long duration however, this is still a possibility. Positional data not included. If Astro, then sighting would be to East. Insufficient data for list evaluation. | |
