k. Preparing officer - 2/Lt Christopher J. Hoppin, FR83607A, Base Information Officer. At first the cause of the sighting was believed to be the meteor or comet Ikeya-Seki. However, [REDACTED] time and path conflicted with the time and flight paths of that object. Her home is in the vicinity (within 7 miles) of Port Columbus Airport, and is therefore witness to a great deal of aircraft traffic. However, she still sincerely maintains this appeared to be some sort of a "flying Saucer." She has seen Venus and recognized as such; she is positive object is not the same.

k. Preparing officer - 2/Lt Christopher J. Hoppin, PR83607A,
Base Information Officer. Preliminary analysis of this sighting on
the part of the undersigned indicates; late hour, television still on
with white noise on screen, possible strong flood light in back yard.
Combination of circumstances makes this sighting unlikely. However,
marks in back yard plus Mrs. Pike's statement of great intensity of
light cause need for submission of this report.
