

PROJECT 10073 RECORD CARD

1. DATE 2 Feb 64	2. LOCATION Ely, Minnesota		12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon
3. DATE-TIME GROUP Local _____ GMT 02/2340Z	4. TYPE OF OBSERVATION <input checked="" type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar		<input checked="" type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE civilian		<input checked="" type="checkbox"/> Was Astronomical Meteor <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical
7. LENGTH OF OBSERVATION 5 seconds	8. NUMBER OF OBJECTS one	9. COURSE Se	<input type="checkbox"/> Other _____ <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING Sphere grey sighted at dusk believed to be at 2-3,000 ft az 270 deg moving to 180 deg azimuth over horizon (?) in 5 seconds. Flight straight.		11. COMMENTS Duration and distance indicates that the sighting could have been caused by a meteor. Color consistent with this analysis considering the time of day. . The one of 2 February in Ely, Minnesota I can't go along with that positive identification. I've never heard of a gray meteor. This could have been a kid's balloon, really very close by. It might have been worth a little more follow up because the evaluation could be challenged, I believe. COLOR CONSISTENT WITH ANALYSIS, HOWEVER, LENGTH OF DATA INDICATES POSSIBILITY OF METEOR
