Data returned included additional sightings and indicated that time passage further distorted the original data. Witness 63 yrs old. No additional reports this date from Penna., or surrounding area of this fiery object in the sky. Specific time motion sequence requested. Witness quality of data extremely poor. Duration increased from several seconds to one minute. It is believed that the witness did see something to trigger the report, however the facts and interpretations of what was actually observed have become so distorted that further inquiry would not be of value. It is possible that a fireball or bolide meteor was sighted and the imagination of the witness led to the following report.</p>

June 7-'65
Allentown, Pa.

Dear Mr. McNamara,

I don't know where to send some information that I have regarding an unidentified object. It could have^{been} a guided missile or a flying saucer, I don't^{know} which. On Saturday night about 11²⁰ P.M. I was on my back porch trying to get some fresh air as it was hot and also to gaze at the moon, which was in the west, straight ahead of me, it was a clear, still night, and all of a sudden toward my right side a golden ball appeared going west, coming from the east, it went straight for a second (west) then turned north, then west, again like an arc (see), the speed was slow, it looked like a ball rolling on a floor, then it exploded and a
(over)

strange flame ² appeared in the
form of an oblong, then in a second
it pectured out. The object looked like
a golden sun, about 5 inches wide,
round like an orange, it made no
sound, even with the explosion, it
was at low ceiling (by low ceiling) I
mean it wasn't high in the sky.

A few years ago I saw a green
object flying on a curve like this, but
the green object was small in
comparison.

Sincerely,

1. This office is in receipt of an unidentified flying object report from Miss [REDACTED] of [REDACTED], Allentown, Pennsylvania. The following is a suggested reply:

a. Dear Miss [REDACTED]

Your letter to Secretary McNamara has been forwarded to the Air Force for evaluation. Evaluation of your sighting, 5 June 1965, is not possible without further information; we need to know the total duration of the sighting, variation in apparent speed of the object, and particularly the time taken to execute the curved portion of the flight and the radius of curvature of the trajectory.

In the absence of this necessary information it seems possible that the curved trajectory may have been an illusion and that the object might have been a fireball.

In order that we may make a firm evaluation on your observation, it is requested that you fill out the attached FTD Form 164.

2. The witness states that the object was perfectly round which, if true, rules out the above hypothesis. Therefore, request that your office forward an FTD Form 164 with a letter to Miss [REDACTED]

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

A cylinder: with covers on top and bottom

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? _____
 Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

About 19⁵⁸, over Allentown, object was in the sky about 4 or 5 hours, looked like a golden egg, with windows all around

31. Was anyone else with you at the time you saw the object? (Circle One) Yes No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes No

31.2 Please list their names and addresses:

Cannot give you any names people on the street stood for hours watching. There were people at the windows waving to us on earth. I also saw opal transparent spheres. And also an armada of 12 U.F.O. like sky scrapers. I saw 2 spheres along each side of the sun.

Dear Mrs. [REDACTED]

Thank you for sending this laboratory an account of your unexplained experience. I wish it were possible to reply personally to all who wrote, but the response to the request has been so generous that this is not practicable.

These occurrences from everyday life are the spontaneous events in nature which have given us some of our main questions for research. While we do not try to draw final conclusions from such experiences, we do use them in large numbers for any new ideas they may afford us in guiding future inquiries. We are grateful, therefore, for your reports, which are of course confidential; and we would welcome others you may have or may persuade your friends to send us.

Unfortunately our research is not yet at a stage at which answers to all the questions raised are available. However, if you are interested in reading something about the work in parapsychology, we would be glad to send you an introductory pamphlet and a list containing references for further reading.

Sincerely yours,
