Between 8 12 & 8 20 PM -
About 100 miles to the east & 15° elev. - proceeded across the zenith in a southwest by west - almost west. Thought it was a high flying aircraft but there was no sound and the lights were too bright. About as bright as Jupiter - but orange color. As he faced it the light on left went off and on twice during a period of about 8 seconds. Became very dim but not completely out.

You took your eyes away for a moment & when you glanced back it was gone. You carefully examined the sky - the light did not reappear - however at this time you heard a sound like a drone - did not resemble jet or reciprocating engine - sounded more like 6 or 8 engins to-gether.

~~Reported this after sch of - at Univ of - your mentioned this phenomenon to your mother who in turn mentioned that to~~

After classes, at home, your mother mentioned that your brother had a saucer. Then you checked with him - compared notes - carefully - and saw the same thing. Then you called ATIC -

Leaving house - walking towards car - facing east - Saw Orange star - bigger than Jupiter - Was moving in a Westerly direction.

Turned car around to face East - sat & watched for five minutes.

Turned car & faced south - opened window - heard a sound like a drone - a more than one aeroplane - no resemblance to sound of jet nor conventional type motor.

when the lights reached their apex they disappeared.

In movement from east to apex at interval the left light would blink on & off and the right light remained on at all times.

They were too close together to be wing tips of an aeplane. If the plane was really high the light would not be as big and bright as they appeared.

Total time better than five minutes -

This person was looking towards Jupiter as he does frequently. Saw another light - orange tint - coming towards him 75° Bearing — as it approached it appeared like two light. Went into house and fetched a home-made telescope. Definitely saw two light — could not tell whether they were joined or not. Light turned towards North & then only one light was visible.

—+—

while conversing on phone he saw light again — this time through window — came towards him & then blanked out.

—+—

At 20:13; still talking on phone, the light appeared again about 5° height than previously. Size - about twice size of Jupiter. Slowly moved West — could definitely see two light. As they moved overhead one light stayed on and the other was flashing. Had some sound to it — heading West and disappeared beyond woods towards Dayton, — time 20:20: this last sighting took place while talking at telephone to me — he left phone and went out for better sighting for a couple of minutes — heard the slight sound and saw the flashing light.
