Dear Sirs:

Three friends and I thought we spotted an unidentified flying object. The following is all we thought you'd want.

1. We saw the object on Sept. 1, 1965.
2. We saw the object at 8:50 p.m. to 9:
3. We are in the Central Time zone and we are on Daylight Savings Time
4. We were in an alley talking when one of us saw it. The nearest postal address was 2141 Touhy Ave, which is in Chicago, Ill.
5. We saw the object for about 20 to 25 minutes. We are not positive.
6. There wasn't a trace of daylight. There were a few stars out. The moon was bright.
7. It was brighter than the background, and was as bright as an automobile light about a mile and a half away.
8. The object seemed to veer off to the right and then to the left. Other wise it just moved straight north.
9. It didn't move behind anything in the sky, but it was lost to our view when it got behind a house.
10. It didn't move in front of anything either.
11. The object appeared to be a solid.
12. We didn't look at it through any eyeglasses, sunglasses, etc.
13. The object made no sound, and it was white.
14. The edges of the object where like those of a star.
15. There was only one object.
16. It is impossible to estimate the distance or speed of the object.
17. The object was as big as the head of a pin.
18. When we spotted the object we where in the residential district.
19. That night was very clear and there was a slight breeze.
20. It was also dry and cool that night.
21. You are the first official we are talking.
22. The three persons I was with also saw the object. Their names are as follows.

[Redacted]
Chicago, Ill. Chicago, Ill. Chicago, Ill.

23. This is the first time any of us have seen anything like this.
24. We couldn't estimate the size of the object either.
25. My name is

A. This is where we first spotted the object.
 At first it seemed directly in front of us, but when it should have passed directly overhead it was way over to the east. The object always went north except for the slight veering.

A. The size of the object as seen by us.

A. Is where we first spotted it.
 B. Is where we lost sight of it, because of garage C.

The object is not shown zigzagging in this picture.

COMMENT: The sighting observed by this person was clear and she did not act overly excited. Was definitely sure she was not seeing things, she assured her husband of this, being that he was the first to call attention to this. This party, after terminating our telephone call, called back and stated her husband had called her saying it was reported over the radio that there was an obvious sighting of some object at approximately the same time that this occurrence took place. I have no way of determining if this was an aircraft or satellite of our own or foreign.
