Brief:

- ① Round on top - suggests balloon
- ② Blurred - but with a yellow halo ← suggests balloon when bathed with light
- ③ Rocking movement ← suggests balloon, under variable wind conditions
- ③ Time: 0805Z - 8 = 2705 hrs = 12:05 PM (Night) - (not U.S.)

~~WX Bureau Station track 2 balloons at sundown. See latest 4.5 weather observations not cell~~

- ④ Source does not give a single azimuth, direction, bearing or exact location of object - only seen half way (50%) up the sky somewhere.
- ⑤ Therefore: A very imp. EEI missing.

Insufficient Data to conclude.
